

Civil Engineering Services

Finitas means 'with an end', and that principle sits at the heart of how we work. We look beyond the immediate design to deliver practical engineering solutions that help get projects

Practical civil engineering that considers the whole site.

We provide civil engineering design and technical support from early feasibility through to construction, developing practical solutions that respond to the site, the development and the wider infrastructure.

Our focus is on coordinated, buildable designs that help projects progress smoothly from concept to completion.

Our Services:

Drainage Design

Foul and surface water drainage systems

SuDS Design

Sustainable drainage, attenuation and discharge strategies

Flood Risk

Flood Risk Assessments and drainage strategies

External Works

Site levels, hardstanding and external works design

Highways & Access

Access roads, junctions and development infrastructure

Site Development

Feasibility, earthworks and infrastructure coordination

£1,000,000 Professional Indemnity & Public Liability Insurance.

Can provide fixed-fee or hourly rate.
