

Domestic & Residential Engineering

Finitas means 'with an end', and that principle sits at the heart of how we work. We look beyond the immediate design to deliver practical engineering solutions that help get projects...

Engineering that helps get your project built.

Whether you're altering your home, planning an extension or dealing with a structural concern, we provide practical engineering advice and design to help move your project forward.

We work with homeowners, builders and designers to provide clear, buildable solutions with the calculations and information needed for construction and Building Regulations.
