

Structural Engineering Services

Finitas means 'with an end', and that principle sits at the heart of how we work. We look beyond the immediate design to deliver practical engineering solutions that help get projects forward.

Practical structural engineering from concept through to construction.

We provide structural design, assessment and technical support across projects of all sizes, working with clients, architects and contractors to develop safe, buildable and cost-effective solutions.

From individual structural elements through to complete building structures, our focus is on clear engineering that helps move projects forward.
